

Installing Philips battens just got a whole lot easier

Introducing the new
e-Batten range from Philips

PHILIPS

sense and simplicity

The T8 and T5 range.

Energy efficient and easy to install.

The new range of Philips fluorescent electronic ballasts are lightweight and a breeze to install thanks to a new cover plate.

They're energy-efficient too, providing you with the perfect solution for virtually any commercial environment.

The TMS 150 range comes in the usual T8 models. Or you can choose the new TMS 151 T5 model for

even greater energy savings – up to 20% over a standard T8 electronic ballast. The new quality European HFPIII programme start ballasts ensure superior performance and extended lamp life.

You can adapt the new Philips e-Ballasts to a variety of environments using an extensive range of attachments that include prismatic diffusers, industrial reflectors and wire guards.
